# PRP PROFACTOR®

Omega-3 fatty acids, lactoferrin, coenzyme Q10,  
and antioxidants

Supports and enhances Platelet-Rich  
Plasma (PRP) treatment.

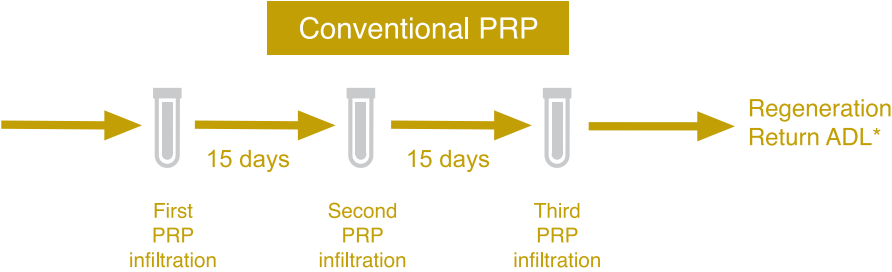

Helps improve the presence of growth  
factors by supporting platelet QUALITY.

Supports the body's natural mechanisms  
involved in biological therapies.

V\_1

**:AS&NL**

Platelets live for about 7 to 10 days<sup>1</sup>. Taking **PRP PROFACOR®** for 15 days helps support the full platelet renewal cycle (one package).

\* ADL Activities of Daily Living

A biological therapy, by definition, is a treatment that works by using the body's own natural cellular processes to achieve therapeutic benefits.

What platelets contain reflects a person's metabolic, inflammatory, and oxidative balance. These three areas can be supported through proper nutrition. **PRP PROFACOR®**

The results<sup>2</sup> show **that PRP becomes less inflammatory and more supportive of the body's natural antioxidant and anti-inflammatory processes.**
